## Pesticide Analysis

Date of Analysis: 15-Jun-17

As a guideline for pesticide screening, Anandia Labs uses the Oregon White Paper entitled "Technical Report: Oregon Health Authority's Process to Determine Which Types of Contaminants to Test for in Cannabis Products, and Levels for Action". Anandia's pesticide screen is performed using (LC-MS/MS) and can screen down to below single digit ppb concentrations for most pesticides. Currently we analyze for 51 pesticides, fungicides and PGRs. [Anandia Method: AL-407 v1]
